

# Prem kumar

Infrastructure Engineer

Infrastructure Engineer with experience in system administration, networking, and cloud technologies. Skilled in Linux administration, Windows Server management, and Active Directory administration. Experienced in configuring and managing network devices including switches, routers, and firewall appliances. Familiar with AWS services, Docker, Terraform, and Ansible for infrastructure deployment and automation. Demonstrates strong understanding of maintaining secure, reliable, and scalable IT environments.

## Experience

|                                         |                         |
|-----------------------------------------|-------------------------|
| Futurenet Technologies India Pvt. Ltd.  | Chennai, Tamil Nadu     |
| Hybrid infrastructure Associate Trainee | November 2025 - Present |

- Worked with Active Directory Domain Services (AD DS) for user account creation and group policy management.
- Configured network switches with VLAN segmentation and routers using dynamic routing protocols.
- Worked with firewall devices to monitor network traffic and enforce security policies to block unauthorized or suspicious activity.
- Configured Linux storage servers using Logical Volume Manager (LVM) to manage disk volumes, enable flexible storage allocation, and support efficient storage management.

## Education

|                                                    |                                   |
|----------------------------------------------------|-----------------------------------|
| Bharath Institute of Higher Education and Research | Bachelor of Technology • 8.4 CGPA |
| Computer Science                                   | 2019 - 2023                       |

## Projects

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
